DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in Paper No. 13 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 26 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Liao (6,056,591).

In regard to claim 26, Liao discloses a LAN cable dispensing device comprising: a casing 10; and a flat, Category 5 compliant cable having a first portion 5 and a second portion 2, the first portion 5 of the LAN cable being fixed relative to the casing 10 and having an extremity including a first RJ-45 modular plug 50 and the second portion 2 of

Art Unit: 2833

the LAN cable being extendible from and retractable under spring load into the casing 10 and having an extremity including a second RJ-45 plug 20.

In regard to claim 28, Liao discloses that the casing 10 includes a top surface; and a handle projects from the top surface. The recitation of "a handle projects from the top surface" is so broad that virtually any surface of the casing meets this limitation.

Allowable Subject Matter

4. Claims 1-7 and 36-45 are allowed.

5. Claims 27, 29-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: In regard to claim 1, the prior art fails to provide, teach or suggest multiport circuitry having a plurality of ports to interconnect a plurality of computers in a network; a plurality of network communications cables, and the first portion of the communications cable having an extremity including a first connector to be coupled to one of the ports of the multiport circuitry; and in combination with other limitations in claim 1. The combination of claim 26 with any intervening claims would render the claims unobvious over the prior art.
